## Stimmen zum Wettbewerb:

**Mario, DH5YM:** Diesmal 1 QSO auf 9cm mit Norbert. Das nächste Mal baue ich die PA in den Transverter. Dann klappt es auch mit anderen Gegenstationen. Danach kommt 3cm wieder dran. Sonst ist leider nicht viel geworden. Enttäuschende 11 QSO auf 23cm. Mehr geht wohl Momentan leider nicht vom Triebenberg. 4 auf 13cm ist auch nicht die Welt. Der Aufwand für 3 Bänder ist doch beachtlich. Ich muss mir also etwas einfallen lassen, das Setup zu vereinfachen. Das gute ist, dass man es allein aufstellen kann. Dauert nur leider 1.5 Stunden. Auf meiner Seite gibts 2 Bilder. Der Haufen mit den Kabeln und das andere die beiden Transverter am Mast. Oben 13cm und unten 9cm.

**Gabi, HA8MV:** Tropo condx was not too good, AP was needed on a manner because of this to work. This tiny one method being time-consuming, 3 hours of his length was short because of this! I say thank you for his patience to everybody!

**Uli, DL1DXA:** Leider konnte ich keine der drei HA-Stationen vom Pfarrberg aus mit 1,5m-Spiegel aufnehmen.

**Andreas, DJ5AR:** Von Eurem Aktivitätskontest habe ich erst jetzt erfahren: Feine Sache! Ich werde versuchen, künftig da zu sein, um ein paar Punkte zu verteilen. Wenn ich QRV bin, dann bin ich auch immer im ON4KST Chat anzutreffen.

**Dirk, DG0DI:** Leider war die Zeit meinerseits sehr knapp und ich konnte nur mal kurz zum Mike greifen.

**Laci, HA5UA:** We was made our small dpxedition to JN96KW HA5UA/P Laci on 23cm, HG5ED/P Erni mainly on 13cm was active. Sadly the 3cm rig wasn't ready for work. The location on a field road near to Dunaújváros 160m asl. Farly not ideal for Ghz activity some directions was totaly bad. A major advantage close to Budapest. 23cm ODX IK3COJ JN65BM 543km Aldo has fantastic signal. 13cm ODX S51ZO Joze from JN86DR 199km wasn't strong but very opreative. In August we look for hilltop type location..... Best 73

**Harald, DL2HSC:** Bestes Sommerwetter auf dem Fichtelberg.

**Misi, HA5NF:** Yesterday was at 9A2SB with HG5ED for short visit. Attached some pictures from his qth and antennas.

**QTH von 9A2SB, JN95GM**

*50 Elemente-Loop-Yagi für 23cm im QTH von Zlatko 9A2SB*

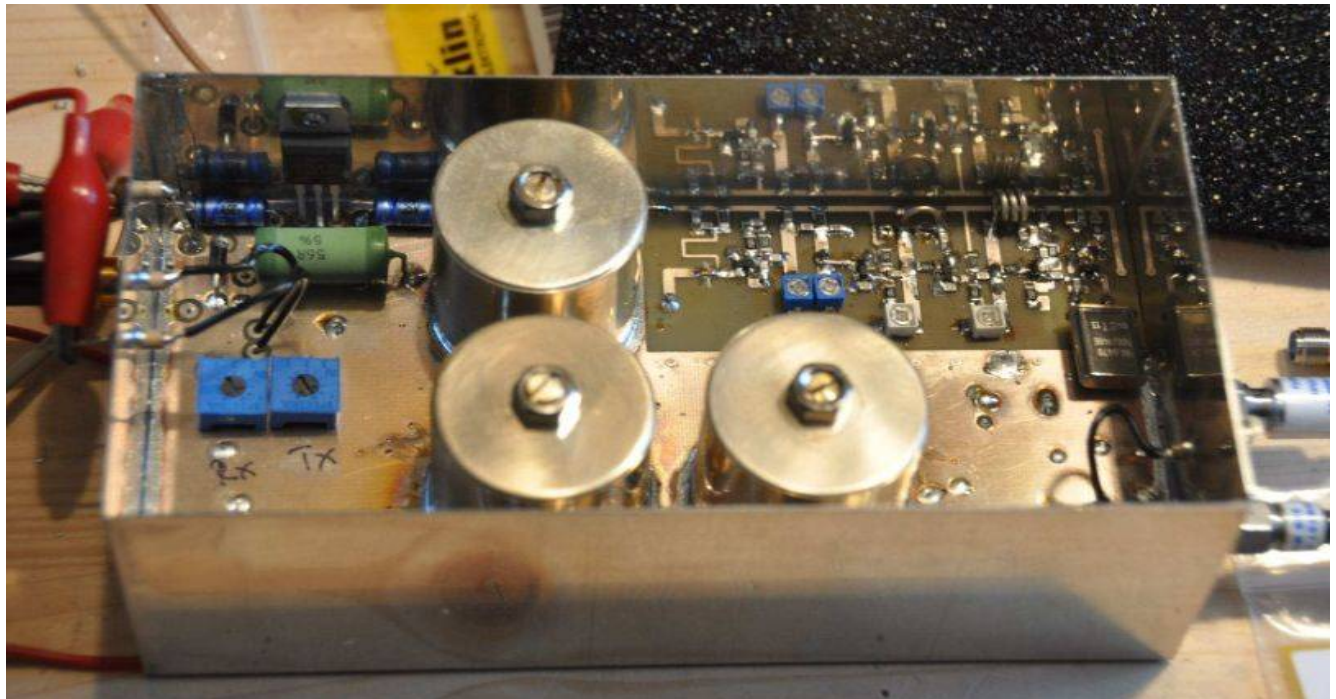

*Ghz-Station von DL1ATI & DH0LS/p im SFBT Aug. 2013 in JO50qu.*

# *DUR-Jahreswertung 2013 Januar-August*
